**EASA AD No.: 2008-1058 vom 21.08.2008**

Ladies and Gentlemen

There are some things that just take a little longer than you would imagine, like any operation involving EASA, EUROCONTROL, SKYGUIDE, LBA, DFS and others.

Because of the large number of involved organisations and the resulting communication tasks, our aim (the new AD), has not been achieved yet.

However, we are very happy to report that all involved parties are working together to reach completion as quickly as possible. In the last two weeks, after our calibration initiative in Switzerland, a number of test reports have been compiled, commented on and revised from various parties. Now we believe that a decision is pending immediately.

In any case, we will report all relevant events promptly. But we only want to distribute new information if they are really substantive. Nothing would be worse than publishing news prematurely and then having to revise them due to new findings.

Again we would like to thank you for your patience.

With best regards,

Funkwerk Avionics GmbH

Michael Frost

Dr. Thomas Wittig
